X @DaylightAcad
#DaylightWeek

This year, the Daylight Awareness Week celebrates daylight thanks to different kinds of contributions and formats, published throughout the week. We will look at natural light and its significance from a historical perspective. Online talks, videos, articles will explore how our relationship with sunlight and our knowledge related to it have evolved over time.

Various contributions and a different viewpoint each day. Check out the event website regularly and spread the word!

Has our perception of the sun changed over the centuries? Is there traditional knowledge or uses related to sunlight we should learn from? How did the invention of the light bulb influence the way we live? How has the relationship between architecture and natural light developed through time?

Get involved by sharing resources in relation to our topic, post about the importance of daylight through the ages, and use **#DaylightWeek** on social media to be part of the campaign. Let's make daylight shine even brighter!

One of the week's must-sees:

Webinar

The Sun and us: ancient times and traditional knowledge

Monday, 13 November 2023
17:00-18:30 (CET)
